⚠ DANGER

Vehicles and equipment powered by internal combustion engines and placed in recreational vehicles may cause carbon monoxide poisoning or asphyxiation, which could result in death or serious injury.

- The flammable liquids used to power these items can cause a fire or explosion, which can result in death or serious injury.
- To reduce risk:
1. Do not ride in the vehicle storage area when vehicles are present.
 2. Do not sleep in the vehicle storage area when vehicles are present.
 3. Close doors and windows in walls of separation (if installed) when any vehicle is present.
 4. Run fuel out of engines of stored vehicles after shutting off fuel at the tank.
 5. Do not store, transport, or dispense fuel inside this vehicle.
 6. Open the windows, openings, or air ventilation systems provided for venting the transportation area when vehicles are present.
 7. Do not operate propane appliances, pilot lights, or electrical equipment when motorized vehicles are present.

FEDMAQA

Instrument panel featuring a pressure gauge, two analog gauges, and control switches.

Electrical control panel with multiple outlets and switches, including a 'LIFT' switch.

Standard electrical outlets and switches on the left side of the panel.
